1. Introduction

The Recruitment Module shall provide a structured and standardized approach to managing recruitment activities within the Human Resources function of the organization. It shall support the full recruitment lifecycle including workforce planning, recruitment request processing, vacancy management, job posting, candidate processing, interview management, selection, and onboarding handover. The system shall be operated under HR governance and shall ensure consistency, transparency, and traceability of recruitment activities. The module shall be configurable for different organizational structures.

2. Purpose

The purpose of the Recruitment Module shall be to enable structured management of recruitment activities within HR. It shall ensure alignment between workforce demand and recruitment execution while supporting both planned and unplanned hiring. It shall also maintain a centralized candidate pool for future use.

3. Scope

The Recruitment Module shall cover the full recruitment lifecycle including workforce planning, approval, recruitment requests, vacancy management, job posting, candidate processing, screening, interviews, selection, and HRIS integration for onboarding and offer management where applicable. It shall support HR as process owner and allow participation from Work Units, Hiring Managers, CEO, and Candidates.

4. Definitions

Workforce Plan:	Structured HR plan defining staffing requirements over a defined period.
Recruitment Request:	Formal request to initiate hiring.
Vacancy:	Approved open position for recruitment.
Candidate:	Individual applying for a vacancy.
Candidate Pool:	Central repository of candidate profiles.
Screening:	Evaluation of candidate eligibility.
Shortlisting:	Selection of candidates for interview.
Interview Panel:	Assigned evaluators for interviews.
Offer:	Formal employment proposal.
HRIS:	System for employee lifecycle management.

5. Stakeholders

Stakeholder	Responsibility
HR	End-to-end recruitment ownership
Work Units	Workforce planning and requests
Hiring Managers	Evaluation and interviews
CEO	Workforce plan approval
Candidates	Application and participation and let them review their application status
HRIS	Offer and onboarding execution

6. Business Rule

The Recruitment Module shall operate under the following business rules:

- The Human Resources function shall own and govern the end-to-end recruitment lifecycle.
- Workforce plans shall be subject to CEO approval prior to initiation of any recruitment activities.
- All recruitment requests shall be directly linked to an approved workforce plan where applicable.
- Recruitment requests outside the workforce plan shall require documented business justification.
- Replacement hiring shall be explicitly identified and recorded within the system.
- All vacancies shall be traceable to a corresponding recruitment request or workforce plan entry.
- All candidate records shall be maintained within a centralized candidate pool.
- Candidate records shall be reusable for future recruitment cycles where eligibility criteria are met.

- Offer management and onboarding shall be executed through the HRIS system where integration is available.
- The system shall support standalone operation for offer and onboarding processes where HRIS integration is not implemented.

7. Business Context

Recruitment within the organization represents a structured business process that translates workforce demand into actual hiring outcomes. The process begins with formal workforce planning initiated by Work Units based on operational requirements and organizational growth needs. These workforce requirements are consolidated into structured workforce plans that define roles, headcount, and timelines for recruitment activities. Approved workforce plans establish the authorized basis for recruitment execution, while unplanned recruitment is initiated only when operational urgency or business continuity requires immediate hiring outside the planned cycle.

Once workforce demand is approved, Human Resources assumes ownership of the recruitment execution process. HR is responsible for validating recruitment requests, ensuring alignment with approved workforce plans, and initiating vacancy creation. Each vacancy represents an authorized hiring requirement that is managed through its full lifecycle until closure. Job descriptions are defined or selected from standardized templates and published through controlled job posting channels to ensure appropriate candidate reach and organizational visibility.

Candidates enter the recruitment process through application submission against published vacancies or through inclusion in the existing candidate pool. The system supports structured capture of candidate profiles, documents, and application history. HR performs initial screening based on predefined job requirements, followed by shortlisting of candidates who meet minimum qualification criteria. Hiring Managers participate in structured interview processes, where evaluation is performed using standardized assessment formats to ensure consistency and fairness in decision-making.

The recruitment system ensures that all stages of the process are tracked, controlled, and visible to relevant stakeholders. Interview scheduling, panel assignments, and evaluation capture are managed in a coordinated manner to ensure efficiency and accountability. Final selection decisions are recorded within the system, and successful candidates are transitioned to offer processing and onboarding through HRIS integration where applicable. Unsuccessful candidates are formally communicated through structured regret notifications at the appropriate stage of the process.

The Recruitment Module acts as the central control mechanism that governs the entire hiring lifecycle. It ensures that recruitment activities are not managed in isolation but are instead aligned with organizational workforce planning, approval governance, and standardized execution rules. The system provides visibility,

traceability, and process consistency across all recruitment stages, enabling HR to manage hiring in a controlled, auditable, and repeatable manner across different organizational units.

8. Workforce/ HR/ Planning

FR ID	Requirement	Description
FR-01	Workforce Plan Creation	System shall support creation of workforce plans
FR-02	Planning Structure	System shall support annual and quarterly planning
FR-03	Headcount Definition	System shall capture headcount/total requirements
FR-04	Justification	System shall capture justification/reason for the HRP
FR-05	Draft Management	System shall support draft saving
FR-06	Version Control	System shall maintain versions
FR- 07	Quarterly Planning cadence	The system shall support the HRP or request in quarterly base
FR-08	Submission	System shall support submission

9. Recruitment Request Management

FR ID	Requirement	Description
FR-08	Request Creation	System shall support recruitment request creation
FR-09	Classification	System shall classify planned/unplanned requests
FR-10	Justification	System shall require justification
FR-11	Job Information	System shall capture job details
FR-12	Replacement	System shall identify replacement hiring

10. Vacancy Management

FR ID	Requirement	Description
FR-13	Vacancy Creation	System shall generate vacancies

FR-14	Status	System shall track vacancy lifecycle
FR-15	Dashboard	System shall provide vacancy visibility
FR-16	History	System shall maintain history

11. Job Posting

FR ID	Requirement	Description
FR-17	Job Description Management	System shall support creation and maintenance of structured job descriptions
FR-18	Job Posting Control	System shall support creation, update, and withdrawal of job postings
FR-19	Posting Channels	System shall support internal and external job posting channels (integration)
FR-20	Publishing Authority	System shall allow HR to control publication status of job postings
FR-21	Posting Information	System shall capture role details, qualifications, and employment terms

12. Candidate Management

FR ID	Requirement	Description
FR-2 1	Candidate Registration	System shall support candidate profile creation and registration
FR-2 2	Application Submission	System shall support submission of job applications by candidates
FR-2 3	Document Management	System shall support upload and management of candidate documents

FR-24	Application Tracking	System shall maintain application status across recruitment stages -> whenever a user logs in he can check his status
FR-25	Duplicate Prevention	System shall prevent creation of duplicate candidate profiles

13. Screening and Shortlisting

FR ID	Requirement	Description
FR-26	Screening Process	System shall support HR screening of candidate applications
FR-27	Screening Criteria	System shall support configurable screening rules and criteria
FR-28	Shortlisting	System shall support selection of candidates for interview stage
FR-29	Rejection Management	System shall capture structured rejection reasons
FR-30	Evaluation Notes	System shall support capture of screening comments and assessments

14. Interview Management

FR ID	Requirement	Description
FR-31	Interview Scheduling	System shall support scheduling of interviews
FR-32	Panel Management	System shall support assignment of interview panels
FR-33	Interview Modes	System shall support physical, virtual, and hybrid interview formats
FR-34	Calendar Coordination	System shall provide visibility of interview schedules
FR-35	Rescheduling Control	System shall support controlled rescheduling of interviews
FR-36	Interview Question Management	The system shall support attachment of predefined interview questions or selection of role-based question sets aligned to the vacancy being filled

FR-37	Interview Question Generation	The system shall support generation of interview question sets from predefined question banks based on job role, grade, or functional area
-------	-------------------------------	--

15. Interview Evaluation

FR ID	Requirement	Description
FR-38	Evaluation Forms	System shall provide structured interview evaluation templates
FR-39	Scoring Mechanism	System shall support candidate scoring and rating
FR-40	Interview Outcome	System shall support defined interview decisions (pass, fail, hold)
FR-41	Multi-Round Support	System shall support multiple interview stages per vacancy
FR-42	Evaluation History	System shall retain full interview evaluation history
FR-43	Interview Scoring Mechanism	The system shall support structured scoring of candidates based on predefined evaluation criteria during interview assessments
FR-44	Candidate Ranking	The system shall rank candidates based on aggregated evaluation scores to support final selection decisions

16. Offer and Onboarding Integration

FR ID	Requirement	Description
FR-45	HRIS Integration	System shall integrate with HRIS for offer processing
FR-46	Data Transfer	System shall transfer selected candidate data to HRIS
FR-47	Status Synchronization	System shall synchronize offer status between systems
FR-48	Onboarding Trigger	System shall initiate onboarding process via HRIS upon offer acceptance
FR-49	Standalone Support	System shall support standalone execution where HRIS is unavailable

17. Talent Roaster Management

FR#	Feature / Functionality	Description
FR-50	Talent Roaster Module	The system shall maintain a Talent Roaster as a separate but integrated module for future recruitment consideration
FR-51	Candidate Movement to Talent Roaster	The system shall allow unsuccessful candidates at screening, interview, or final selection stages to be transferred to the Talent Roaster based on defined eligibility criteria
FR-52	Talent Roaster Candidate Reuse	The system shall allow candidates maintained in the Talent Roaster to be considered for future vacancies without requiring profile recreation
FR-53	Talent Roaster Candidate History	The system shall retain previous applications, interview evaluations, scores, and outcomes for candidates maintained in the Talent Roaster
FR-54	Talent Roaster Search and Filtering	The system shall support search, filtering, and categorization of Talent Roaster candidates based on qualifications, experience, skills, and historical results

FR-55	Vacancy Application from Talent Roaster	The system shall allow HR to directly initiate candidate consideration from the Talent Roaster for new vacancies
-------	---	--

18. Reporting

FR #	Feature / Functionality	Description
FR-56	Candidate Source Tracking	The system shall capture candidate source information including LinkedIn, Facebook, Telegram, Company Website, Employee Referral, Friends, and other defined recruitment channels
FR-57	Hiring Minute generation	The system shall generate hiring minute having the process including the selection criteria, score by fetching the attached template
FR-58	Source Analytics Reporting	The system shall provide reporting on candidate source effectiveness and recruitment channel performance
FR-59	Recruitment Cycle Time Metrics	The system shall provide reporting on time taken across recruitment stages from request initiation to offer issuance
FR-60	Vacancy Fulfillment Metrics	The system shall provide reporting on vacancy fulfillment rates and closure timelines
FR-61	Candidate Conversion Metrics	The system shall provide reporting on candidate progression rates across screening, interviews, selection, and offer stages
FR-62	Rejection Metrics	The system shall provide reporting on rejection rates by stage and reason
FR-62	Talent Roaster Utilization Metrics	The system shall provide reporting on candidate reuse from the Talent Roaster and related hiring outcomes
FR-63	Recruitment Dashboard	System shall provide recruitment status dashboards
FR-64	Vacancy Reporting	System shall provide vacancy tracking reports
FR-65	Pipeline Reporting	System shall provide candidate pipeline visibility
FR-66	Source Analysis	System shall provide recruitment source analytics
FR-67	Department Reporting	System shall support department-wise recruitment reporting

19. System Configurability Requirements

FR#	Feature / Functionality	Description
FR-68	Company Profile Configuration	The system shall allow each organization to define and maintain company profile information including branding, organizational structure, and recruitment parameters
FR-69	Pricing Configuration	The system shall support configuration of pricing models and service-related parameters where the Recruitment Module is deployed as a multi-organization platform...
FR-70	Multi-Organization Setup	The system shall support multiple organizations operating independently within a single platform instance, with segregated data and configurations
FR-71	Configurable Fields	The system shall allow each organization to define custom fields for recruitment processes including job requisition, candidate profile, and evaluation forms
FR-72	Workflow Configuration	The system shall support configuration of recruitment approval workflows, including approval stages, sequence, and approvers per organizational requirement
FR-73	Role Configuration	The system shall allow configuration of recruitment-related roles such as HR users, recruiters, hiring managers, and approvers with assignable permissions
FR-74	Job Template Configuration	The system shall allow organizations to create, maintain, and reuse standardized job templates for recurring roles and positions

20. Notification Management

FR ID	Feature / Functionality	Description
FR-75	Candidate Stage Notifications	The system shall automatically notify candidates at each stage of the recruitment lifecycle, including application submission, screening result, interview scheduling, interview outcome, offer status, and final decision
FR-76	Regret / Rejection Notifications	The system shall issue formal regret notifications to candidates who are not selected at any stage of the recruitment process,

		including screening rejection, interview rejection, or final selection rejection
FR-77	Internal Recruitment Notifications	The system shall notify HR users, hiring managers, and interview panel members regarding recruitment activities such as new applications, interview assignments, approvals, and evaluation requests
FR-78	Notification Delivery Channels	The system shall support delivery of notifications through email, SMS, and in-system notifications
FR-79	Event-Based Notification Triggering	The system shall trigger notifications automatically based on predefined recruitment events and status changes
FR-80	Notification History Tracking	The system shall maintain a complete record of all notifications sent to candidates and internal users for audit and tracking purposes

21. Non-Functional Requirements

The system shall provide role-based access, scalability, performance efficiency, configurability, and full traceability of recruitment activities across all modules.

22. Conclusion

The Recruitment Module shall provide a structured HR recruitment system covering the full lifecycle from workforce planning to onboarding handover with HRIS integration and standalone capability.
